THE WORLD'S
FASTEST
MOTORISED
DESK

temptation speed

Whether set up as an individual workplace or a workspace for the team: Sit-stand workstations have been established as standard and offer added value in all aspects. They allow freedom of choice for the user and provide excellent desk work ergonomics.

Double workplace
temptation smart twin speed

STAND FASTER, SIT FASTER

With the height adjustment speed of 150 mm per second, temptation speed is the world's fastest motorised desk.

The benefits of a height-adjustable desk are often not taken advantage of because it takes too long to move the desk from the lower to the upper position. temptation speed offers the solution – due to innovative electronics and a powerful motor, the height adjustment is carried out in no time at all. Changing of posture is encouraged. Quick and simple.

ONE FOR ALL

The individual desk for ambitious performers

Due to its simple and elegant design, the individual desk is ideally suited for use in individual offices as well as in open office environments. The quick height adjustment is an added value for all users who care about changing posture and health.

SPEED IN TWIN PACK

The twin model for working together

temptation smart twin speed can also be used as a double or team workplace. With its simple, elegant design, this model fits perfectly into modern working environments. Four robust table legs for two workstations provide stability and, at the same time, freedom of movement.

PERFORMANCE IN HAND

Intuitive and safe: The innovative control provides speed and, at the same time, guarantees a safe height adjustment of the desk.

In order to avoid unintentional adjustment, the height is regulated by double actuation of the control element: By simultaneously placing a finger on the button and gently pulling in the required direction, the desk can be easily moved into the desired position.

Practical: The USB-C port on the control element. Always close by and easily accessible.

Two speed settings allow for a quick and millimetre-precise adjustment to the desired desk height.

Normal: 35 mm per second
Fast: 150 mm per second

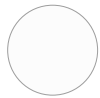

COLOURS AND OPTIONS

The motorised desk meets a wide range of design requirements: It can be configured as a single or double workstation and comes in various frame and desktop colors.

Leg frame colours

Black
